

05 KR MARKET

PROJECT COMPONENTS

Project Role: Associate

Team Size: 4 to 6 people

The intervention scope was defined by the existing components and the additional infrastructure necessary to improve access and functionality of the market precinct.

The main components and interventions in the proposal included:

1. Reorganized Vending
2. Bus Station
3. Meat Market
4. Intramodal transit connector bridge
5. Organized Loading and Unloading
6. Waste Management System
7. Peripheral road redevelopment using principles and guidelines under Tender S.U.R.E.

Personal involvement in the project:

1. To design various options for the Intramodal Transit Pedestrian Connector Bridge
2. Design a layout for organized vending with detailed vending modules
