

# 01 CIVIC CENTRE & LIBRARY

## ZONING AND SPACE DISTRIBUTION

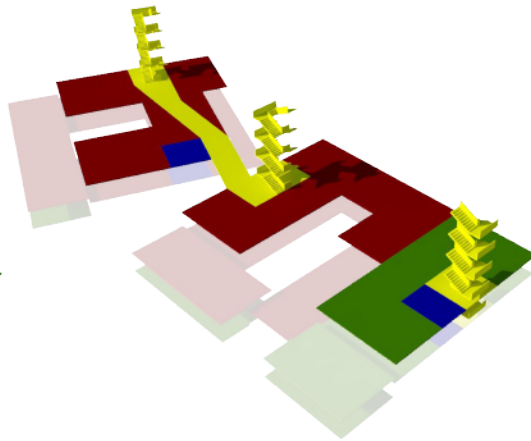

The built component of the project includes the library, art gallery, and the commercial spaces. These have a level of privacy and quietness to be maintained, thereby requiring a separation of the public vs the private.

However the whole space outside is a public space which will have a flow of people through it.

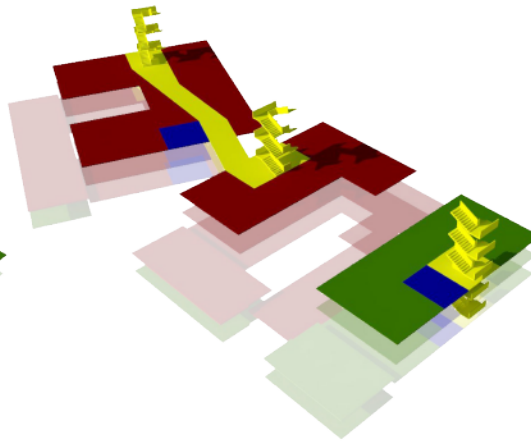

The main challenge was to maintain this distinction while still accomodating connections and access points at different levels.
